

LAB	PRACTICALS
16	Implementation of Select * Into command in SQL Create the following table and perform the following queries: Part – A - Create table World cup from cricket with all the columns. SELECT * INTO WorldCup FROM Cricket; - Create table T20 from cricket with first two columns with no data. SELECT Name, City INTO T20 FROM Cricket WHERE 1 = 0; - Create table IPL From Cricket with No Data. SELECT * INTO IPL FROM Cricket WHERE 1 = 0; - Insert the Data into IPL from Cricket Whose Second Character Should Be 'A' And String Should Have At least 7 Characters in Cricket Name Field. INSERT INTO IPL SELECT * FROM Cricket WHERE Name LIKE '_A_____'; - Delete All the Rows From IPL. DELETE FROM IPL; - Delete the Detail of Cricketer Whose City is Jharkhand. DELETE FROM Cricket WHERE City = 'Jharkhand'; - Rename the Table IPL to IPL2018. EXEC sp_rename 'IPL', 'IPL2018'; - Destroy table T20 with All the Data. DROP TABLE T20; Create the following table and perform the following queries: Part – B - Create a full backup of the SalesRecords table and name it SalesRecords_Full_Backup as a new table. SELECT * INTO SalesRecords_Full_Backup FROM SalesRecords; - Create a table SalesInfo from the SalesRecordstable with only the OrderID, ProductName, and Quantity columns. SELECT OrderID, ProductName, Quantity INTO SalesInfo FROM SalesRecords; - Create a new empty table with the same schema as SalesRecords and name it SalesRecords_Empty. SELECT * INTO SalesRecords_Empty

FROM SalesRecords

WHERE 1 = 0;

Part – C

4. Create a table Sales_North_West from the SalesRecordstable containing only the sales records for the North and West regions.

SELECT * **INTO** Sales_North_West

FROM SalesRecords

WHERE Region IN ('North', 'West');

5. Create a table Product_Summary from the SalesRecords table that summarizes the total quantity sold for each product.

SELECT ProductName, **SUM**(Quantity) **AS** Total_Quantity **INTO** Product_Summary

FROM SalesRecords

GROUP BY ProductName;

6. Create an archive table for all sales made before Oct 15, 2025.

SELECT * **INTO** SalesRecords_Archive

FROM SalesRecords

WHERE SaleDate < '2025-10-15';
